AskAnyAI

AI ASSISTANTS · BETA · WEB APP

EDEL Investment GmbH
As of: 12 November 2026

One question. Several clever minds.

Why trust just one AI when five can debate? At AskAnyAI you ask one question – and several AIs, for example from OpenAI, Anthropic (Claude), Google (Gemini), xAI (Grok) and DeepSeek, answer in one round, read each other and disagree with reasons. You use your own keys; they stay in your browser.

Use cases

A second opinion in seconds

One question, several answers side by side. You instantly see where the AIs agree – and where they don't.

Argument meets counterargument

The AIs read each other's contributions and disagree with reasons. Weak answers become visible quickly.

Your keys, your costs

You connect your own AI accounts. Billing happens directly with the provider; AskAnyAI itself is free.

Highlights

- Several AIs in one round
- Your own API keys
- Keys stay in your browser
- Free platform
