wirrt

AI ASSISTANTS · LIVE · WEB APP

EDEL Investment GmbH
As of: 12 November 2026

A phone number for your AI.

wirrt makes your own AI assistant reachable by phone: book a number, connect an AI provider with your own API key, choose the model and system prompt. In your account you decide whether calls go to the AI, to your phone or first to the AI and then onwards. There is also a second number forwarded to your phone.

Use cases

AI on the phone

Make your own assistant reachable with a phone number – with the provider, model and prompt of your choice.

Control calls

Set it in your account: AI, phone or AI followed by forwarding; change or block profiles at any time.

Use a second number

Forward an additional number to your own phone and keep private and business separate.

Highlights

- AI phone number
- Your own API key
- Routing in your account
- Second number with forwarding
